Děkujeme, že jste podpořili naši tvorbu.

Tato aktivita je určena pro rozvoj pozornosti, zrakového rozlišování, soustředění a vnímání detailu. Děti při ní prozkoumávají skrytý obsah pomocí vody a barevného roztoku, čímž se zábavným způsobem zapojují do poznávání obrázků nebo čtení slov.

CO MATERIÁL OBSAHUJE?

- **10 listů se zadáním** – na každém listu je 12 obrázků (např. zvířata, předměty, potraviny apod.).
- **Ke každému zadání jsou 2 varianty podkladových listů:**
 - **Obrázková varianta** – stejných 12 obrázků jako na zadání, rozmístěné v jiném pořadí (pro mladší děti, které ještě nečtou).
 - **Slovní varianta** – názvy obrázků (např. mrkev, kočka, čtverec) v přeházeném pořadí (pro starší děti – čtenáře).

JAK NA TO?

Příprava prostředí:

- Připravte průhlednou plastovou nebo skleněnou misku, kterou naplníte vodou a lehce obarvíte potravinářským barvivem nebo inkoustem – jen tolik, aby nebylo vidět na dno.

Umístění listu pod misku (varianta obrázková nebo slovní):

- Pod každou misku položte jeden z listů (obrázkový nebo slovní, podle úrovně dětí). Doporučujeme list zalaminovat, aby se nekrčil nebo nenamočil.

Průzkum se skleničkou:

- Děti dostanou skleničku (nebo průhledný kelímek) a pomalu ji pokládají dnem do misky. Dno skleničky opticky prohlédne přes barevnou vodu až na papír pod miskou a zobrazí obrázek nebo slovo, které se pod skleničkou nachází.

Plnění úkolu:

- Děti mají před sebou list se zadáním (s 12 obrázky). Když objeví obrázek/slovo, které mají v zadání, zaškrtnou si ho v rámečku. Mohou používat mazatelné fixy, pokud jsou listy zalaminované.

RADY A TIPY:

- Aktivitu je možné dělat individuálně, ve dvojicích nebo ve skupinkách.
- Práci lze rozdělit na etapy – např. jen 6 obrázků najít a pak si úlohu vystřídat.
- Aktivita se dá krásně využít také jako stanoviště při centrech aktivit nebo jako klidová činnost během dne.

Tato hravá forma hledání pomáhá dětem trénovat zrakovou pozornost, porovnávání, soustředění a – v případě slovní varianty – také čtení s porozuměním. Navíc zapojení vody a kouzelné skleničky dodá úkolu prvek napětí a zábavy!
